MISSION

The International Seakeepers Society promotes oceanographic research, conservation and education through direct involvement with the yachting community. Seakeepers enables the yachting community to take full advantage of their unique potential to advance marine sciences and to raise awareness about global ocean issues. The Seakeepers DISCOVERY Yachts Program is our foremost initiative in accomplishing our mission and goals.

SEAKEEPERS
SOCIETY

PROGRAM ACTIVITY BY CATEGORY

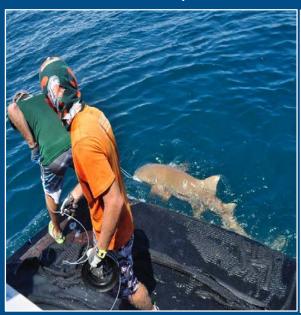

DISCOVERY YACHTS PROGRAMMING

Scientist-Led Expeditions

Educational Outreach Expeditions

Instrument Deployment

Interested vessels can support marine research and education efforts through one of our three strands of Programming. SeaKeepers staff work with the vessel owner to identify research projects that are of interest and can be accommodated by the vessel. Expedition dates and logistics are planned and a SeaKeepers representative attends implement the schedule and document the trip through videos and photos.

VESSEL BENEFITS

Vessels which participate receive a number of benefits. The costs associated with DISCOVERY Yacht Expeditions are considered a donation to SeaKeepers and may be eligible for tax benefits to the extent of the law. Additionally, DISCOVERY Yachts receive recognition on the SeaKeepers' website, social media platforms, and at our exclusive annual events.
